

LUXEFINDER

MODERNITY

Contemporary elegance is conveyed in the use of rose gold for the horns, crown and chronograph pushbuttons.

The 45.5-mm case has sapphire crystals front and back and is water-resistant to 100 meters.

DISCOGRAPHY

At the top of the dial, dual date discs visibly come together to form the date display, while a trio of oxidized aluminum discs at 3, 6 and 9 turn against stationary markers to indicate small seconds and chronograph minutes and hours.

FIVE SPOT

A total of five rotating discs replace the traditional counter hands and comprise the date display in the Pierre DeRoche GrandCliff TNT Penta chronograph, a dial-less timepiece in black PVD-coated titanium with steel and rose gold elements. \$31,660, 877.527.4765, pierrederoche.com
